

FREE GUIDE STEP-BY-STEP METHOD

Create the first pages of your *coloring book* with AI

A simple method to find an **original idea**, write your prompt and produce a **credible prototype**.

30'

To a prototype
from idea to first pages

1

Original concept
built with a simple formula

1

Master prompt
reusable for the whole series

3-5

Test pages
checked and ready to judge

5 STEPS

— YOUR RESULT

A prototype in *30 minutes*.

By the end of this guide, you will have an **original concept**, a **reusable prompt** and **three to five test pages**.

PHASE

1

STEPS 1-2

Choose a direction

You start from visible market signals, then build an angle of your own.

PHASE

2

STEPS 3-4

Generate the test pages

You create one page at a time with a stable art direction and precise variables.

PHASE

3

STEP 5

Decide if the project deserves more

You check quality before moving from prototype to a print-ready file.

Your path *in 5 steps*

i

GOOD TO KNOW

This guide promises neither instant publishing nor automatic income. It helps you build a **solid foundation**. Full layout, cover and publishing come next.

— STEP 01

01 Study the market without copying

A popular cover is a signal of interest. It must not become a model to reproduce.

10 books to look at, minimum

- ☐ The theme and target audience
- ☐ The level of detail in the drawings
- ☐ The words used in the title
- ☐ The expectations visible in reviews
- ☐ The criticisms that come up often

YOUR RULE

Combine several observations to create a **fresh angle**. Never use the name of an artist, a brand or a competing book in your prompt.

EXAMPLE

Trend: cozy worlds.

Angle: **rainy-day reading moments for adult beginners.**

CHECK

02 — STEP 02

Build an original concept

This formula avoids ideas that are too vague, like a plain book of cats or flowers.

THE CONCEPT FORMULA

Audience

+

Moment

+

World

+

Detail level

+

Difference

Filled-in *example*

AUDIENCE

Adult women who are new to coloring

MOMENT

A calm 15-minute break

WORLD

Cozy reading nooks on rainy days

DETAIL LEVEL

Moderate, with large areas that are easy to color

DIFFERENCE

Every scene hides a discreet cat and a reading ritual

Your concept *in one sentence*

FILL IN

I am creating a coloring book for _____, who want
_____, set in a world of _____, with a
_____ level of detail and this difference: _____.

03

— STEP 03

The master prompt to copy

Replace the parts in brackets. Generate one illustration at a time.

REUSABLE PROMPT · 6 BLOCKS

COPY

01 · ROLE

Act as an art director who specializes in printed coloring books for [AUDIENCE].

02 · ILLUSTRATION

Create a fully original page showing [PRECISE SCENE], in the world of [THEME]. Include [KEY OBJECTS]. The intended feeling is [MOOD].

03 · STYLE

Clean black line art on a pure white background. Closed outlines, consistent line weight, [LOW / MODERATE / HIGH] level of detail, large areas that are pleasant to color. Balanced vertical composition, designed for a printed page.

04 · CONSTRAINTS

All important elements stay inside a safety margin. No text, no letters, no logo, no signature, no watermark, no color, no gray, no shading, no photographic effect. Avoid large black areas, broken lines, tiny details and cropped objects.

05 · ORIGINALITY

Do not reproduce any cover, illustration, brand, protected character or identifiable artist style. Use only the concept described here.

06 · SERIES CONSISTENCY

For the next pages, keep the same line weight, the same level of detail, the same composition logic and the same visual features of [RECURRING ELEMENT].

TIP

Copy the prompt as is, then only change the **parts in brackets**. This keeps a stable art direction across the whole series.

CHECK

04

— STEP 04

Generate five test pages

The goal is to validate a direction, not to produce fifty pages right away.

01

Create one page

Use the master prompt with a very precise scene.

02

Review the result

Spot open lines, strange objects and overly dense areas.

03

Fix one variable

Change only the scene or the detail level to understand the effect.

04

Create four variations

Keep the same visual rules to test consistency.

05

Pick three pages

Keep only the ones you could actually print.

USEFUL CORRECTION SENTENCE

COPY

Keep the same art direction. Only fix [PROBLEM]. Keep the overall composition, the line weight, the level of detail and every other element.

CHECK

05

— STEP 05

Check before you continue

An image that looks great on screen can still be bad to print or to color.

VISUAL CHECKLIST

- ☐ Lines are crisp and truly black.
- ☐ The background is white, with no hidden gray.
- ☐ The outlines that matter are closed.
- ☐ Hands, faces and objects make sense.
- ☐ Details are large enough to be colored.
- ☐ No unintended text or symbols appear.
- ☐ The scene is original and does not copy a competitor.
- ☐ Important elements stay away from the edge.

TEST PAGE EXAMPLE

Generated from the concept in this guide.

DECISION

3/3

If three pages pass this checklist and look like they belong to the same book, **your concept deserves to be developed.**

CHECK

— WORKFLOW

What you can *automate*

Automation speeds up repetitive tasks. Final approval remains a **human decision**.

• ASSISTED

• AUTOMATIC

• HUMAN

STEP	POSSIBLE AUTOMATION	APPROVAL
Research	Theme list and research table	ASSISTED
Concept	Variations from a standard sheet	ASSISTED
Prompts	Automatic insertion of variables	AUTOMATIC
Generation	Batch creation from approved briefs	ASSISTED
Files	Naming, numbering and filing pages	AUTOMATIC
Check	Checklist and keep-or-redo decision	HUMAN
Publishing	File review and KDP approval	HUMAN

GOOD HABIT

Start without a complex pipeline. First stabilize your prompt and checklist on five pages. Then automate what already works.

— AFTER THE PROTOTYPE

The steps *before KDP*

Your prototype proves the idea. You still need to build a consistent, printable product.

01 Create all the pages
Develop a consistent series and remove weak illustrations.

02 Prepare the interior
Choose the trim size, margins and bleed, then export a clean PDF.

03 Create the full cover
Prepare the front, spine and back with the exact dimensions.

04 Set up the book
Enter the metadata and price, and disclose AI-generated content.

05 Preview and test
Use the KDP previewer and, if possible, check a physical proof copy.

CHECK IN THE OFFICIAL KDP HELP

- Rules on AI-generated content
- Trim sizes, margins and bleed
- Manuscript templates
- Definition of low-content books

STARTER PACK TAKE IT TO THE NEXT LEVEL

Turn your prototype into a *KDP-ready book.*

The **Starter Pack** guides you from selecting your pages all the way to preparing and publishing your first book.

Create a consistent, printable interior

Prepare dimensions, margins and files

Build the full cover

Publish the book step by step

Plan your launch and gather honest feedback
